- Exclusive No. 3050 cabinet drawer inserts now available as optional equipment in all other styles. See page 5.
- Four rollers on each drawer for smooth, easy operation.
- Handsome finger-tip drawer pulls in satin chrome.
- Drawer dust covers in all models.
- Exclusive satin aluminum protective strips on top edges of drawers.
- Quality all ways — Always value.

WHY

Allison

MAKES DENTAL CABINETS
THAT SERVE YOU BETTER

The W. D. Allison Company is a pioneer in the manufacture of professional equipment. For seventy years, since 1884, the name Allison has been synonymous with quality and excellent value. Since Allison dental cabinets were introduced over a decade ago, they have won an enviable reputation in the dental profession. Many innovations have been introduced by Allison, and today Allison cabinets incorporate many outstanding and exclusive features obtainable

in no others. Among Allison "firsts" are the Drawer-O-Matic cabinet and cabinets completely covered with beautiful and durable Formica. A comparison of Allison cabinets will convince you of their superiority, part of which is achieved by their complete manufacture under one roof and the close supervision that can thereby be obtained.

Modifications in design, for improvement of our products, are subject to change without notice.

Recessed Formica tops in black or gray, with matching base, are optional at no extra cost.

All styles available in solid colors or covered completely with Formica in beautiful, matching color tints. ..

POPULAR SIZE MOBILE CABINET

No. 3040

This size cabinet, pioneered by Allison, has become the largest seller and finest value in the field and the most copied of all dental cabinets.

Now, to further enhance its popularity, it is offered in completely Formica covered models in beautiful matching color tints of Washington coral, Jade green, Washington blue and Biscayne blue and Platinum blond. The Formica is especially made for Allison in superb mahogany grain. The noteworthy lasting quality of the No. 3040 has been well established; and now, with Formica covered models, practically indestructable beauty has been achieved.

The new style, gracefully designed, satin chrome drawer pulls add greater distinction and perfect operating ease.

This cabinet is still available in all of the standard solid dental color enamels and color tints as listed on page 11. Standard equipment is also listed on that page, and features described on page 10.

Dimensions: Over-all height 42½", Height to working surface 40", Width 25", Depth 16".

- Mobile—on ball bearing casters
- 8 Wood-steel drawers
- 5-tray width drawers
- 4 Rollers on each drawer
- Steel dust covers
- Recessed Formica working surface in black or gray
- Steel base finished black or gray
- Removable bottle insert
- 20 Vitrolite trays
- 12 ½-ounce bottles
- Formica covered bottle compartment
- Cement insert
- Rubber drawer bumpers
- Drawer stops

No. 3050

DRAWER-O-MATIC CABINET

- Touch-O-Matic drawers
- Formica covered models
- 4 Rollers on each drawer
- Formica push plates on solid colored cabinets
- Cushioned drawer stops
- Insulated drawers—eliminate noise
- Recessed Formica working surface in black or gray
- Formica covered bottle compartment
- Removable bottle insert
- Functional dust-proof silicate and bottle inserts
- Step-type bur block
- 20 Vitrolite trays
- Steel X-ray film box
- 5-tray width drawers

Since the Allison Drawer-O-Matic cabinet was introduced two years ago, it has become increasingly popular. Drawers open with a touch of the back of the hand which eliminates contamination of the fingers from bacteria laden drawer pulls.

In addition to all standard dental solid color finishes listed on page 11, this cabinet is also available in exclusive Formica covered models in standard color tints of beautiful mahogany grain.

The No. 3050 comes equipped with new style silicate insert and step-type bur block with lucite holder for carbide and diamond instruments. These are shown in the small cuts at left.

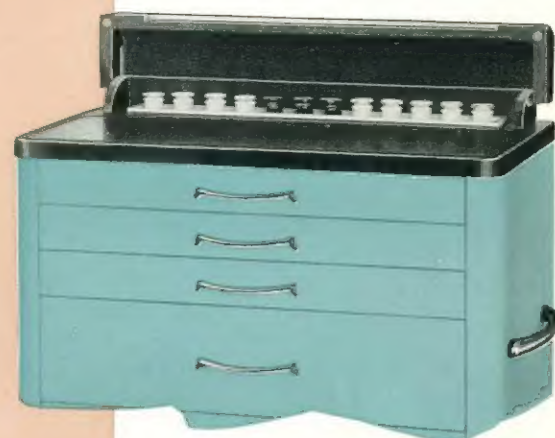

Note the exclusive and outstanding new features listed on this page.

Dimensions: Over-all height 42½", Height to working surface 40", Width, 25", Depth 16".

See pages 10 and 11 for cabinet equipment and standard finishes.

NEW WIDE-DRAWER CABINET

No. 3060

This cabinet is a new addition to the Allison line. It is made for those dentists who prefer a slightly larger cabinet than either of those shown on the two preceding pages. It is of the same high quality as all Allison cabinets, and a comparison with other cabinets will readily make apparent its excellent value.

The No. 3060 is also offered in all standard dental colors as well as completely Formica covered models in matching color tints in beautiful mahogany grain.

The top edges of all drawers are covered with satin aluminum strips to protect that vulnerable edge from marring. This is another Allison first and another step toward finer dental cabinets.

Dimensions: Over-all height 42½", Height to working surface 40", Width 29⅛", Depth 16."

Please see pages 10 and 11 for cabinet equipment and standard finishes.

- Mobile—on ball bearing casters
- 8 Wood-steel drawers
- 4 Rollers on each drawer
- Recessed Formica working surface in black or gray
- Steel dust covers
- 24 Vitrolite trays
- Finger-tip drawer pulls
- Cement insert
- 12 ½-ounce bottles
- Removable bottle insert

No. 3030

LARGE MOBILE CABINET

The No. 3030 is one of the finest mobile cabinets made. It has been entirely redesigned for greater beauty and higher efficiency.

This cabinet is made for the dentist who prefers two tiers of narrow drawers rather than the wide-drawer style shown on the opposite page. There are 16 wood-steel drawers, each operating smoothly and easily on four rollers. All drawers are automatically held in when closed so that they will not open when the cabinet is moved, yet open easily when desired.

This model is now offered completely covered with Formica as well as in standard dental solid colors.

Top edges of drawers are protected with satin aluminum strips.

Dimensions: Over-all height 42½", Height to working surface 40", Width 31¼", Depth 16."

Please see pages 10 and 11 for cabinet equipment and standard finishes.

- 16 Wood-steel drawers
- 4 Rollers on each drawer
- 24 Vitrolite trays
- Recessed Formica working surface in black or gray
- Cement insert
- Bur block
- Steel X-Ray film box
- Sanitary paper drawer liners
- Finger-tip drawer pulls
- 3-tray width drawers
- 12 ½-ounce bottle
- Removable bottle insert

Matching solid color cabinets or FORMICA covered in beautiful color tints.

COMPACT MOBILE CABINET

No. 3020

This model has always been a very popular one. It is of the same high quality and excellent value as all other Allison cabinets, and unlike most comparable cabinets, it is equipped with steel dust covers between each drawer.

The No. 3020 is offered in exactly the same finishes as the larger Allison models and is also available completely covered with Formica.

It is ideal where a small cabinet is indicated and is especially suitable for the hygienist.

Dimensions: Over-all height 42½", Height to working surface 40", Width 21", Depth 16".

Please see pages 10 and 11 for cabinet equipment and standard finishes.

- Mobile—on ball bearing casters
- 8 Wood-steel drawers
- 4 Rollers on each drawer
- Protective satin aluminum on top of drawer edges
- 4-tray width drawers
- Recessed Formica working surface in black or gray
- 16 Vitrolite trays
- 9 ½-ounce bottles
- Rubber drawer bumpers
- Recessed steel base in black or gray
- Removable bottle insert
- Sanitary paper drawer liners

Nos. 300

DESK . . . 370 SWIVEL CHAIR . . . 360 GUEST CHAIR

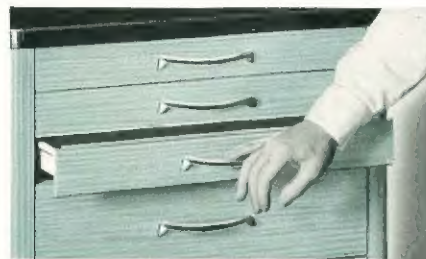

The Futura desk set is a fine example of practical and efficient design coupled with expert workmanship and construction. The Futura desk is designed for utmost comfort and practical use. The single pedestal open-end design permits easy access even in a small office, and this functional design adds a touch of distinction that can not be denied. Drawer bodies are made of genuine African mahogany and have adjustable partitions. Steel guides afford easy drawer operation. The drawer section can be supplied on either the right or left hand side.

The chairs are worthy companions and are luxuriously padded with 2" foam rubber. A choice of DuPont Fabrilite is offered in brown, red, green, blue or black.

Finishes available are genuine American walnut, genuine mahogany, golden blond mahogany or platinum blond mahogany.

Desk dimensions: Top 54"x30", Height 30".

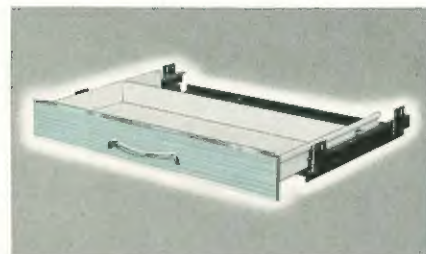

ALLISON FEATURES AND CABINET EQUIPMENT

Note how easy it is to use the finger-tip drawer pulls on Allison cabinets.

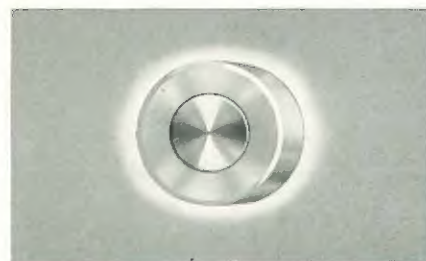

One finger does the work. All top drawer edges are protected with satin finish aluminum strips.

FINGER TIP DRAWER PULL

This picture shows Allison drawer and dust cover construction. The dust cover for the drawer beneath is also the carrier for the drawer above. Each drawer and dust cover is, therefore, "one unit" with guides and rollers electrically welded in place.

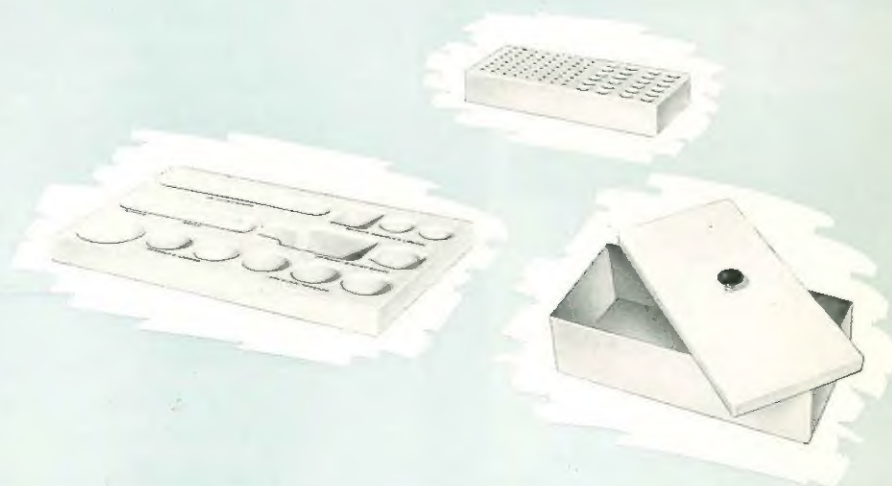

ONE UNIT- DRAWER IN DUST COVER

All Allison cabinets are now equipped with 4 rollers to each drawer. All are nylon rollers which are quiet and smooth in operation. The front rollers, in addition to being made of nylon, are also equipped with ball bearings which, in our opinion, is the finest combination that can be used.

FOUR ROLLERS TO EACH DRAWER

The cement insert, steel X-ray film box and bur block are shown here. The steel film box eliminates breakage, is easier to keep clean and offers greater protection. The finish is lasting, white-baked enamel.

TRAYS

Allison Vitrolite trays are of highest quality and even color. They are expertly molded with round corners inside and out, to present a smooth and easily cleaned surface. All types are 4"x8" and are available in the styles shown at the right.

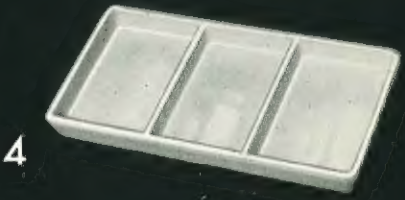

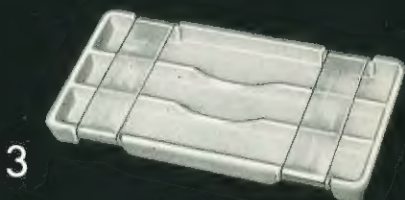

ALLISON CONSTRUCTION

The first Allison cabinets were introduced to the profession over a decade ago. They were an immediate success and have now become the leaders in progress in their respective styles. Allison is a pioneer in the fine cabinet work since 1884 and Allison dental cabinets conform with our ideals of quality established those many years ago. Only the finest woods and materials, for the purpose, are used. Research is a continuous process at Allison, and when new and better materials are developed, and when new and better construction methods are devised and proved, they are adopted. You can always be sure your Allison cabinet is made of top quality materials and with advanced construction methods.

GUARANTEE

Allison cabinets are manufactured from highest quality materials. Our craftsmen have had years of experience, and we take great pride in the excellence of our products. We assume full responsibility that our products are in first-class condition when they leave the factory: If defective products are received, it should immediately be called to our attention. We will replace such defective merchandise at no cost. No claim for defective merchandise or finish will be allowed after one year from date of shipment from factory.

UTILITY TABLES

These utility tables of high quality are exceptionally practical accessories for any dental office. They are sturdily constructed of 16 gauge furniture steel and are offered in all of the solid standard dental colors as listed on page 11. There are four styles as shown and designated, and can be supplied with glides in place of casters if desired.

The standard top is 16"x20", black porcelain enamel, but Formica tops can be supplied at extra cost. Table height is 32."

AUXILIARY CABINETS

Allison auxiliary cabinets are made in a variety of styles and are offered in all the solid standard colors as listed on page 11. All finishes are Hi-Bake enamel.

AUXILIARY CABINETS

They are exceptionally well made of 18 gauge furniture steel, and the doors and drawer fronts are of double-wall construction. All drawers are 14" wide by 11"x3" inside dimensions.

The heavy gauge steel pedestal bases conceal easy rolling casters — or, if preferred, glides can be supplied. The cabinet compartment is equipped with a shelf and is ventilated.

The 16"x20" top is black porcelain enamel, but Formica tops can be supplied at extra cost. Cabinet height is 32".

No. 4062-DR—Two drawers, with door and rail.

No. 4066—Six drawers, no rail.

No. 4066-R—Six drawers, with rail.

4062-D Top

4061-DR Center

4066-R Bottom

The No. 4020 Instrument cabinet shown at the left has two large easy running drawers and large double-door storage compartment. The upper section is equipped with two bulb edge glass shelves and an excellent door lock.

This cabinet is made of heavy gauge furniture steel and the doors and drawer fronts are of double wall construction and insulated against noise. Dimensions: Height 60", Width 28", Depth 16 $\frac{3}{4}$ ", Instrument section inside, 26 $\frac{1}{2}$ x26 $\frac{3}{4}$ "x15 $\frac{1}{8}$ ".

The No. 4030 treatment cabinet shown below is constructed in the same manner as the No. 4020 described above except that the top drawer is partitioned. The working surface is Formica available either in black or gray. There is a protective guard rail.

Dimensions: Height to working surface, 32", Width 28", Depth 16 $\frac{3}{4}$ ".

ABOVE...INSTRUMENT CABINET
BELOW...TREATMENT STAND

NO. 4020
NO. 4030

These Dura Steel cabinets are made with the same care and precision as all Allison dental cabinets. They are modern in design and are constructed of 18 gauge furniture steel with electrically welded joints. The finish is baked enamel and the cabinets are available in all of the solid standard dental colors as listed on page 11. The pedestal bases, which allow plenty of toe space, are made of heavy 16 guage steel, finished in black baked enamel.

- Mobile—on ball bearing casters
- 5-tray width drawers
- 4 Rollers on each drawer
- Recessed Formica working surface in black or gray
- Steel base finished black or gray.
- Formica covered bottle compartment
- Removable bottle insert
- Rubber drawer bumpers
- Drawer stops
- Drawer "hold-in" feature
- Double-wall drawer fronts
- Baked enamel finish

No. 5040

DURASTEEL CABINET

Now Allison offers a quality steel cabinet in the most popular size. The No. 5040 has the exclusive Allison Formica working surface — recessed on all four sides and Formica covered bottle compartment.

This cabinet is made of heavy gauge furniture steel, the body of which is one single unit. Drawer fronts are double-wall construction and drawers roll easily on four ball-bearing rollers. Drawer "hold-in" feature is standard.

The No. 5040 is offered in all the standard dental colors in durable hi-bake enamel finish.

Dimensions: Over-all height 43", Height to working surface 40 $\frac{1}{4}$ ", Width 25", Depth 15 $\frac{1}{2}$ ". Dimensions do not include handles.
